SUMMARY

QA Engineer with 4 years across Fintech, E-commerce, Government, and EdTech, executing 1,000+ test cases and detecting 300+ defects across manual and automation testing (Selenium, Playwright, API testing). Experienced coordinating UAT and regulatory sign off with cross border teams in China, Singapore, and Indonesia.

EXPERIENCE

QA Analyst
NTUC Learning HUB (Contract) ***Jan 2026 - Sep 2026, Batam***

- Analyzed 30+ Functional Specification Documents (FSD) across the AWB Admin and LXP Learner platforms, covering areas such as Registration, Course Management, Course Enrollment, Installment, Funding, Subscription, Trainer Management, and Company Management, to support new feature development and system enhancements.
- Executed 200+ end to end business flow test cases (15+ steps per case on average) across five UAT phases (UAT2, Proxy, MOT1/MOT2, RTM) using Jira and Excel, capturing 20+ evidence points per case to ensure clear, auditable test results.
- Reported and tracked 50+ defects in Jira, then performed retesting to confirm fixes met expected quality standards before release.
- Collaborated internally daily with a 15 person QA team with the test lead, and cross vendor support and development teams (MVPT, NCS) to align on feature flow, test data, and defect resolution across the AWB and LXP UAT cycles.
- Authored testing flow documentation and consolidated key information from platform support briefings into shared team references, reducing repeated questions and improving onboarding for new testers.

QA Engineer
Akulaku Finance Indonesia ***Jul 2025 - Dec 2025, Jakarta***

- Analyzed Business Requirement Documents (BRD) for IT Support Ticketing Helpdesk, Employee Workflow (OA System), and multiple internal platforms.
- Developed and maintained 500+ comprehensive test cases stored in MeterSphere as the test case management system.
- Executed end-to-end testing across staging and production environments, achieving 98% release readiness.
- Implemented test automation using Selenium, TestNG, and Extent Reports, reducing manual regression time by up to 80% for the IT Support Ticketing Helpdesk platform.
- Coordinated and supported UAT sessions with Product teams and Business users.
- Documented SIT and UAT results into regulatory compliance reports, producing 50+ formal documents.
- Managed master UI and API test case repositories, maintaining 500+ active test cases for local product lines.

QA Product
Akulaku Finance Indonesia ***Jul 2024 - Jul 2025, Jakarta***

- Analyzed Business Requirement Documents (BRD) from the Head Quarter team in Shenzhen, China to support new feature development and enhancement across multiple products, including BNPL, SME Loan, Channeling, and Internal Tools.
- Reviewed QA testing results from the head quarter team to ensure alignment with local business requirements and regulatory compliance.
- Developed and maintained local UAT test cases based on business requirements.
- Performed re-verification testing to ensure all defects were resolved and functionalities met expected outcomes prior to release.
- Conducted User Acceptance Testing (UAT) in collaboration with business users, coordinated fixes with developers, and compiled detailed UAT result reports.
- Prepared and signed UAT sign-off documents as final validation before production release.

Quality Assurance Tester
LG Cns (Contract) ***Jan 2024 - Apr 2024 Jakarta***

- Reviewed the DJP Coretax Tax Project BRD (Business Requirements Document) to understand the specific testing needs of the product within the DQM team.
- Performed testing in QA1 and QA environments to validate the product's adherence to quality standards on a regular basis.
- Retested between 5 to 10 bug daily tickets from FVT2 testing conducted by internal DGT (Directorate General of Taxes).
- Engaged in regular communication with developers and business analysts, providing updates on the progress of bug fixes and other testing activities.
- Actively participated in testing the data enrichment module, executing over 80+ test cases to ensure comprehensive coverage and functionality validation.

Quality Assurance Tester
Tokopedia (Contract) ***Sep 2022 - Dec 2023 Jakarta***

- Analyzed Product Requirements Documents (PRDs) for projects including Tokopedia Plus, Tokopedia Promo Internal Tools, Merchant Voucher Discount, Tokonow Schedule Delivery, Promo Page Improvement, and SmartEsmond Endurium UI resulting in a 100% understanding of testing requirements.
- Developed comprehensive test plans and 200+ test cases aligned with PRDs and project-specific testing objectives.
- Conducted rigorous testing in staging and production environments, ensuring a 98% adherence rate to quality standards.
- Detected and reported 300+ bugs and issues during testing using bug management software such as JIRA.
- Evaluated and verified 90% of the bugs reported by the development team, conducting retests after fixes to ensure compliance with quality standards.
- Coordinating manual QA for each tribe and actively participating in pre-production manual testing before the release of applications on various platforms, including iOS, Android Mainapp, Sellerapp, Lite, and Desktop.

EDUCATION

Bachelor of Information System
UNIKOM • Bandung • 2021
Relevant Course : Programming and Software Development, Systems Analysis and Design, Information Security and Cybersecurity, DBMS

CERTIFICATIONS

- Learn AI Tools & Build AI Agents for Testing & QA Automation - Udemy (September 2026)
- Core Java for Automation Testers - Udemy (May 2024)
- Selenium WebDriver with Java - Udemy (March 2024)
- Rest API Testing (Automation) from Scratch-Rest Assured Java - Udemy (2024)
- Web UI Testing With Katalon : Low Code Journey - Katalon Academy (November 2023)

INVOLVEMENT

Event Committee - IDSTB Conference 2024
Jakarta, Indonesia • Indonesia Software Testing Board (IDSTB) • August 2024 - October 2024
- Assisted in event planning and coordination to ensure smooth execution of the conference.
- Collaborated with a team of professionals to manage media assets and deliver high-quality visual content.

Asisten Lab. Hardware
Bandung • AP2SC UNIKOM • November 2018 - May 2019
- Supported 3 classes and managed 20+ devices to maintain optimal lab functionality.

Technical Skills

Manual Testing: Test Plan & Case Design, UAT, SIT, Defect Management, API Testing (Postman, Metersphere)
Automation Testing: Selenium, Katalon, Rest Assured, Java (OOP), Cucumber, TestNG, Jenkins
Tools: JIRA, Trello, Lark, Metersphere, Postman, DBeaver, IntelliJ IDEA, Microsoft Teams, Slack, WeCom, Claude
Languages: English (Intermediate), Bahasa Indonesia (Native)
